

Fig: 7(c)

Hole	x	y
A1	-15	-20
A2	0	0
A3	20	-18
A4	40	15
B1	40	0
B2	60	35

All dimensions are specified as x and y distance from an origin point, generally placed at the lower left corner of the drawing.

In tabular co-ordinate dimensioning each feature is labelled with a letter and then information provided in a table as shown in Fig: 7(b) and 7(c)

It is not always necessary to select origin point at the bottom left corner, it can be selected at any convenient position as shown in fig: 7(c) where element A2 is selected as origin.

Practical Hints on Dimensioning:-

1. Dimensioning should be done so completely that further calculation or assumption of any dimension, or direct measurement from the drawing is not necessary
2. Every dimension must be given, but none should be given more than once. Refer fig: (2)
