

Q:1 Point A of 65mm line AB is in H.P and 15mm in front of V.P. Line is inclined to H.P, V.P. at angle of 40° and 35° respectively. Draw the projection of line AB and locate its traces.

Given data:

Line AB = 65mm (TL)

End A in the H.P

15mm in front of V.P

Line AB makes angle $\theta = 40^\circ$ to H.P

Line AB makes angle $\phi = 35^\circ$ to V.P

Draw the projection and also show the traces

Q:3 Draw the projections of a line AB when its end A is 20mm above the H.P and 10mm in front of the V.P. its end B is 55mm above the H.P and 60mm in front of the V.P. and distance between projectors of A and B (measured parallel to the XY line) is 45mm. Find TL, θ and ϕ of the line

Q:5) A line AB, 90 mm long is inclined at 45° to the H.P and its top view makes an angle of 60° with the V.P. The end A is in the HP and 12 mm in front of the V.P. Draw its front view and find its true inclination with the V.P.

→ Given data:

end A is in H.P and 12mm in front of V.P

Line AB = 90 mm (T.L)

angle made by line with H.P $\theta = 45^\circ$

angle made by PL with V.P $\phi = 60^\circ$

Draw the projection of line and find its true inclination with V.P

Q:2 A line AB 75mm long is inclined at an angle of 35° to the V.P its end point 20mm above the H.P and 15mm in front of V.P. Plan length of the line is 50mm draw the projection of the line AB assuming it to be in the first quadrant also locate its traces

Given data:-

Q:4) A line AB, 20 mm long has its end point A 10mm in front of the V.P. Line makes an angle of 30° with the H.P and 58° with the V.P. End B of the line is 20 mm above the H.P. Draw the projections of the line. Find distance of end A from H.P. Locate traces of the line.

Q:6) The front View of straight line AB is 60 mm long and is inclined at 60° to the reference line XY. The end point A is 15mm above H.P and 20 mm in front of V.P. Draw the projections of line AB if it is inclined at 45° to the V.P and is situated in the first quadrant (Dihedral angle). Determine its true length, and inclination with the H.P

METHOD OF PROJECTION SIGN: MARKS:

Q:2 Point A of 65mm line AB is in H.P and 15mm in front of V.P. line is inclined to HP & V.P. at an angle of 40° and 35° respectively. draw the projection of line AB and locate its traces?

Given data:-

Line AB = 65mm (TL)

end A in the H.P

15 mm in front of V.P.

Line AB makes angle $\theta = 40^\circ$ to h.p

Line AB makes angle $\phi = 35^\circ$ to V.P.

Draw the projection and also show the traces.

Q:2 A line AB 75mm long is inclined at an angle of 35° to the V.P. its end point is 20mm above the h.p and 15mm in front of V.P. plan length of the line is 50mm draw the projection of the line AB assuming it to be in the first quadrant also locate its traces.

Given data :-

Q:3 Draw the projections of a line AB when its end A is 20mm above the H.P and 10mm in front of the V.P. its end B is 55mm above the H.P and 60mm in front of the V.P. and distance between projectors of A and B (measured parallel to the XY line) is 45mm. Find TL, θ and ϕ of the line

Q:4) A line AB, 80 mm long has its end point A 10mm in front of the V.P. Line makes an angle of 30° with the H.P and 58° with the V.P. End B of the line is 80 mm above the H.P. Draw the projections of the line. Find distance of end A from H.P. Locate traces of the line.

Q.5) A line AB, 90 mm long is inclined at 45° to the H.P and its top view makes an angle of 60° with the V.P. The end A is in the HP and 12 mm in front of the V.P. Draw its front view and find its true inclination with the V.P.

→ Given data:

end A is in H.P and 12 mm in front of V.P

Line AB = 90 mm (T.L)

angle made by line with H.P $\theta = 45^\circ$

angle made by PL with V.P $\phi = 60^\circ$

Draw the projection of line and find its true inclination with V.P.

Q.6) The front view of straight line AB is 60 mm long and is inclined at 60° to the reference line XY. The end point A is 15 mm above H.P and 20 mm in front of V.P. Draw the projections of line AB if it is inclined at 45° to the V.P and is situated in the first quadrant (Dihedral angle). Determine its true length, and inclination with the H.P.
