

Q.4) Divide the given circle of 80mm into 12 equal parts.

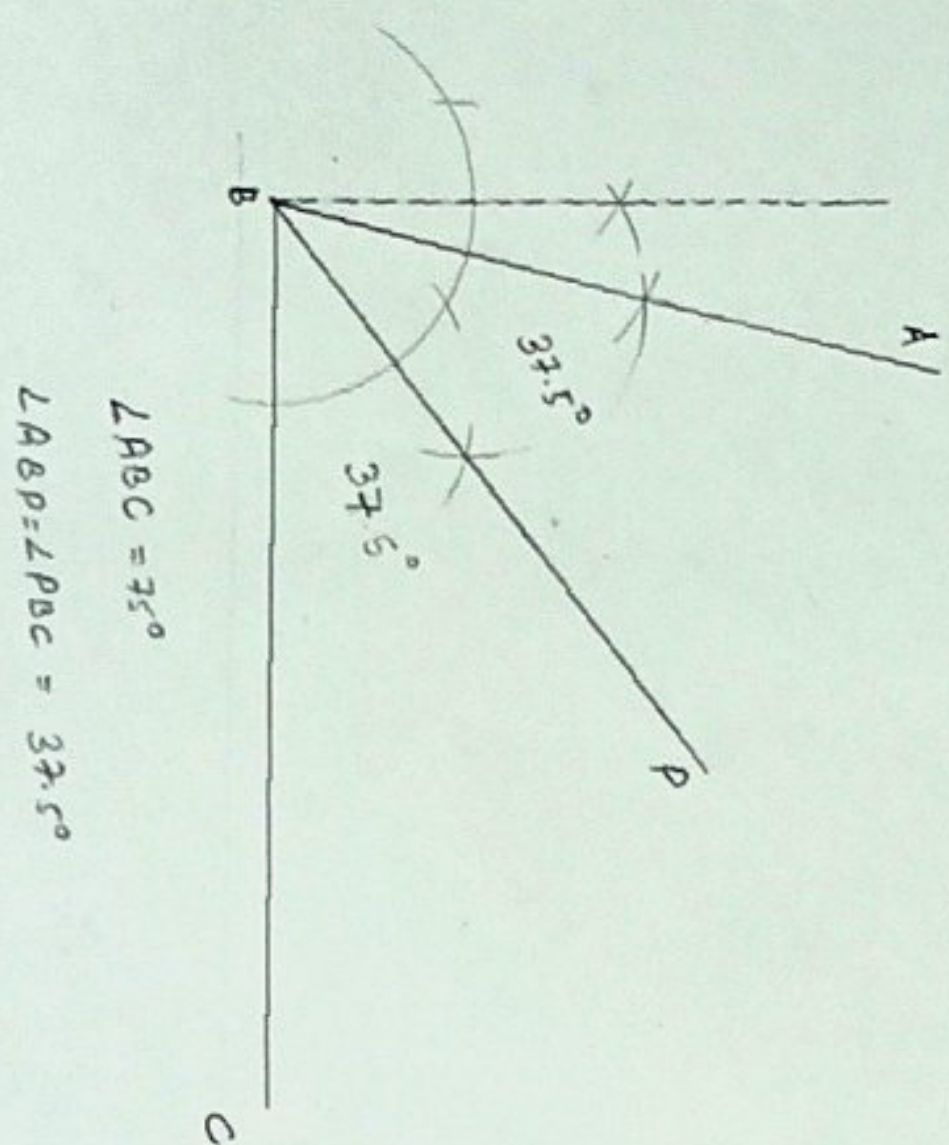

Q.7) Draw the Hexagon of 60mm by a angle protector and compass.

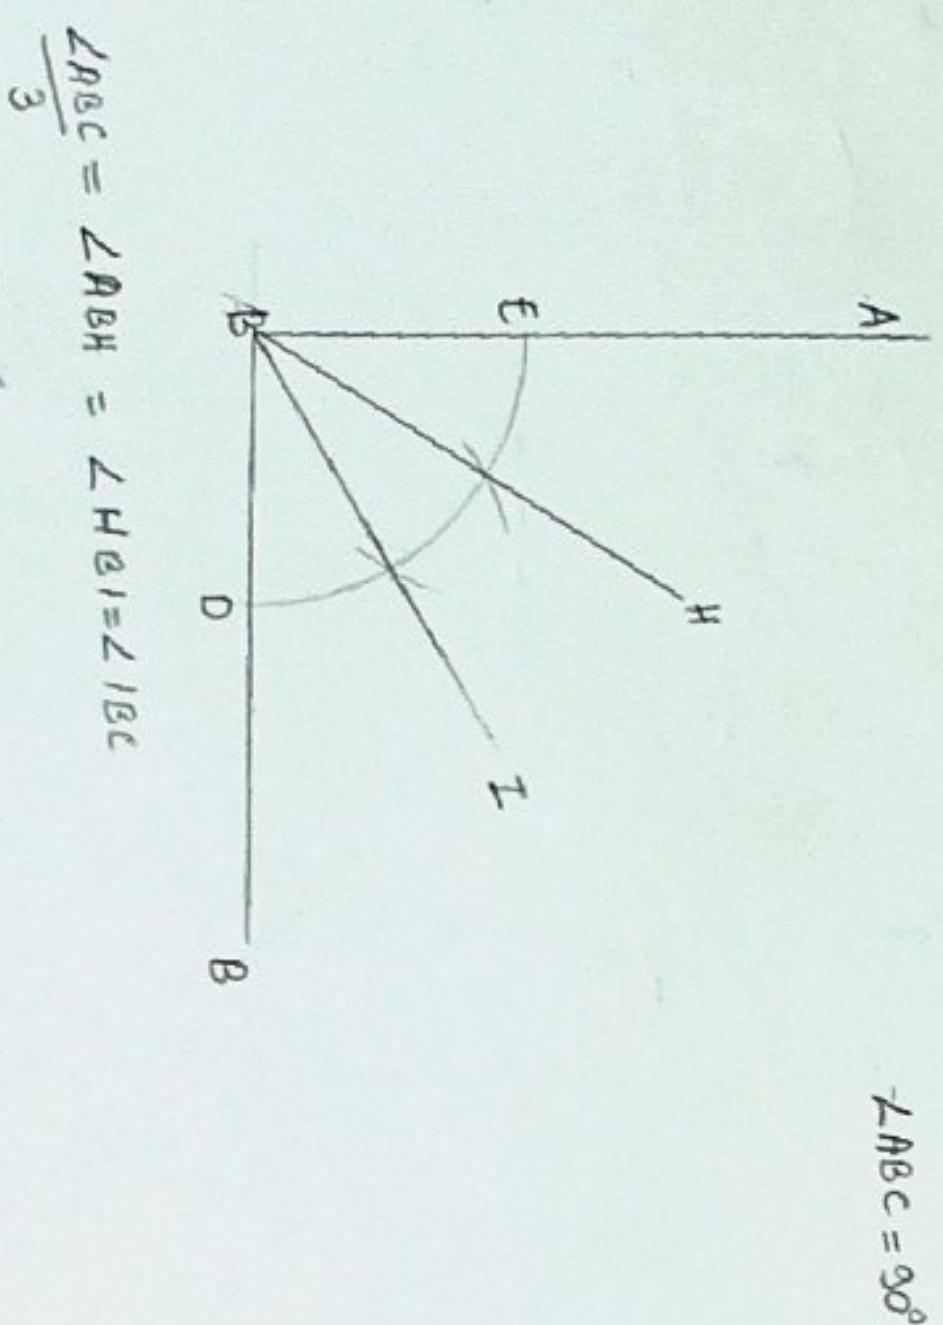

1) Divide the line of length 187mm into 14 equal parts.

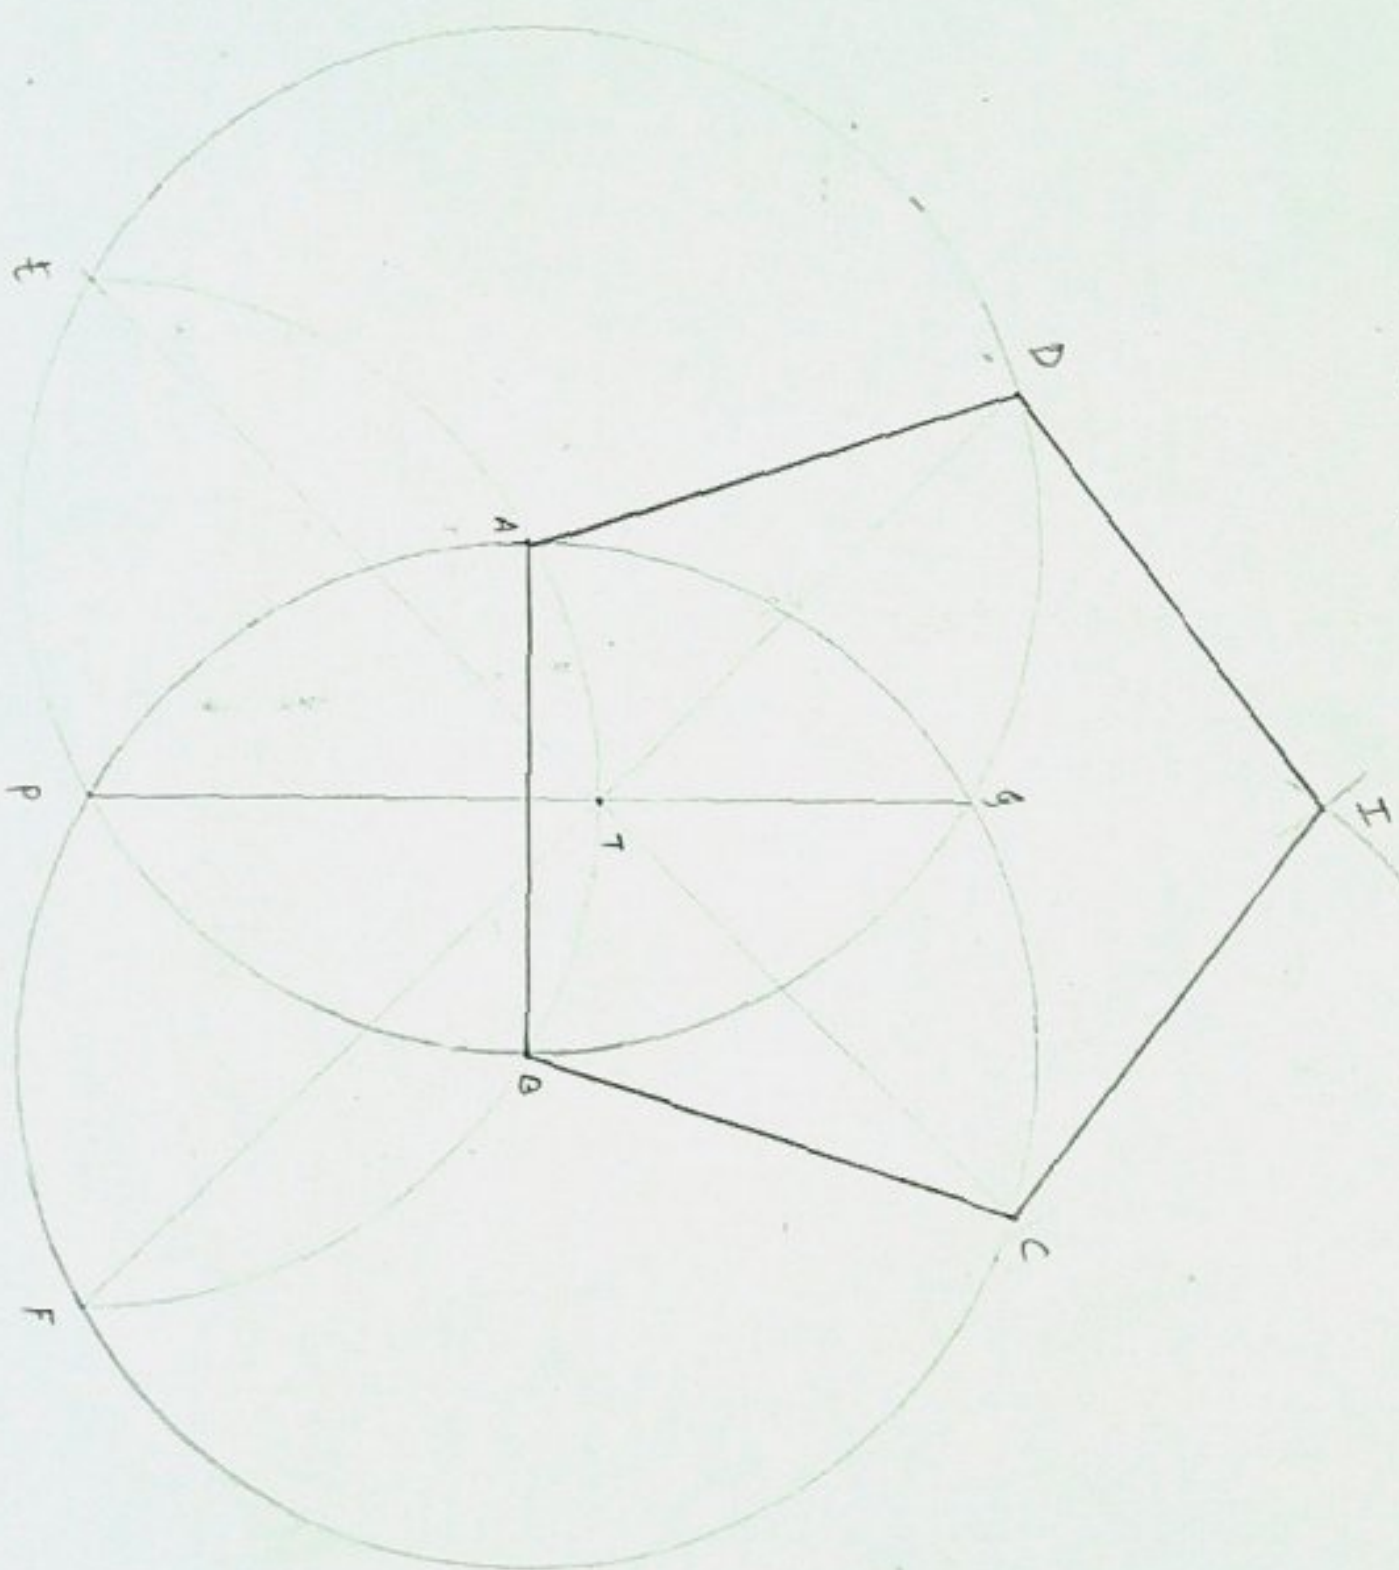

2) Bisect the angle of 75° with the help of compass.

3. Trisect the given angle 90° with the help of compass.

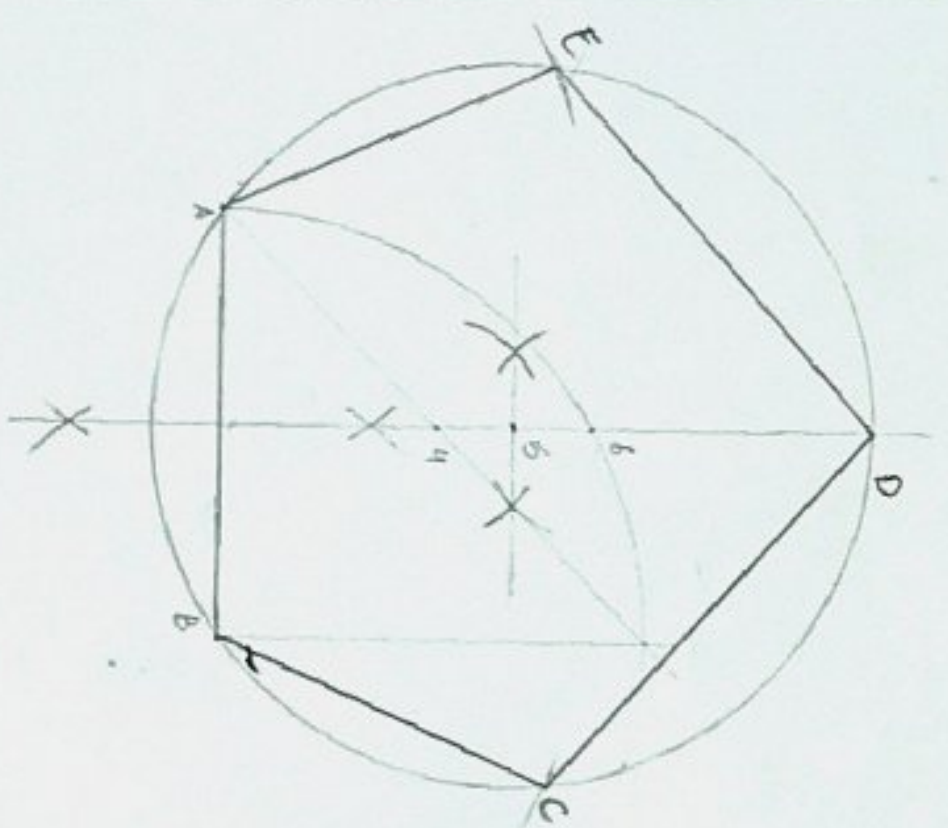

5. Draw a pentagon of 60mm length with the special method.

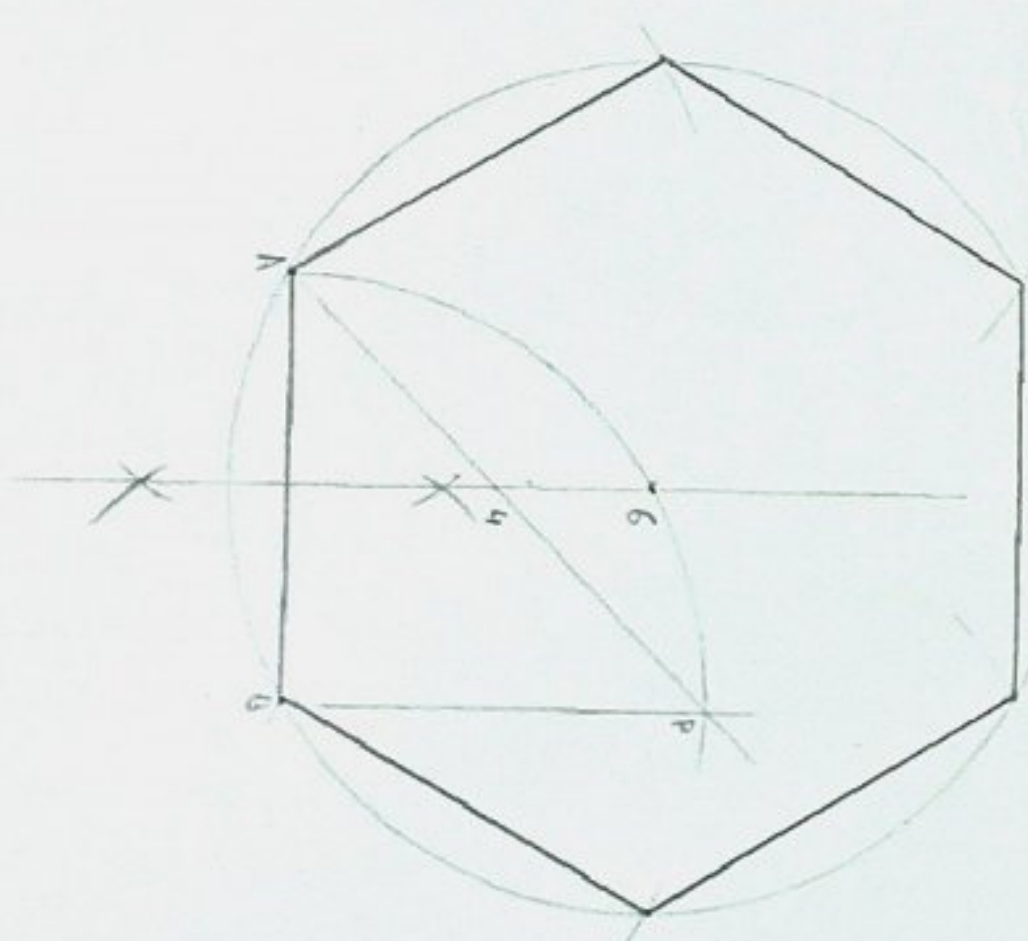

6. Draw a Pentagon & Hexagon of 50mm side by the General method

Pentagon:-

Hexagon:-

GRAMIN TECH. 3, MANA6, CAMPUS, VISNUPURI NANDED.

Name: Nabeel Ahmed Ahmed Mubassir

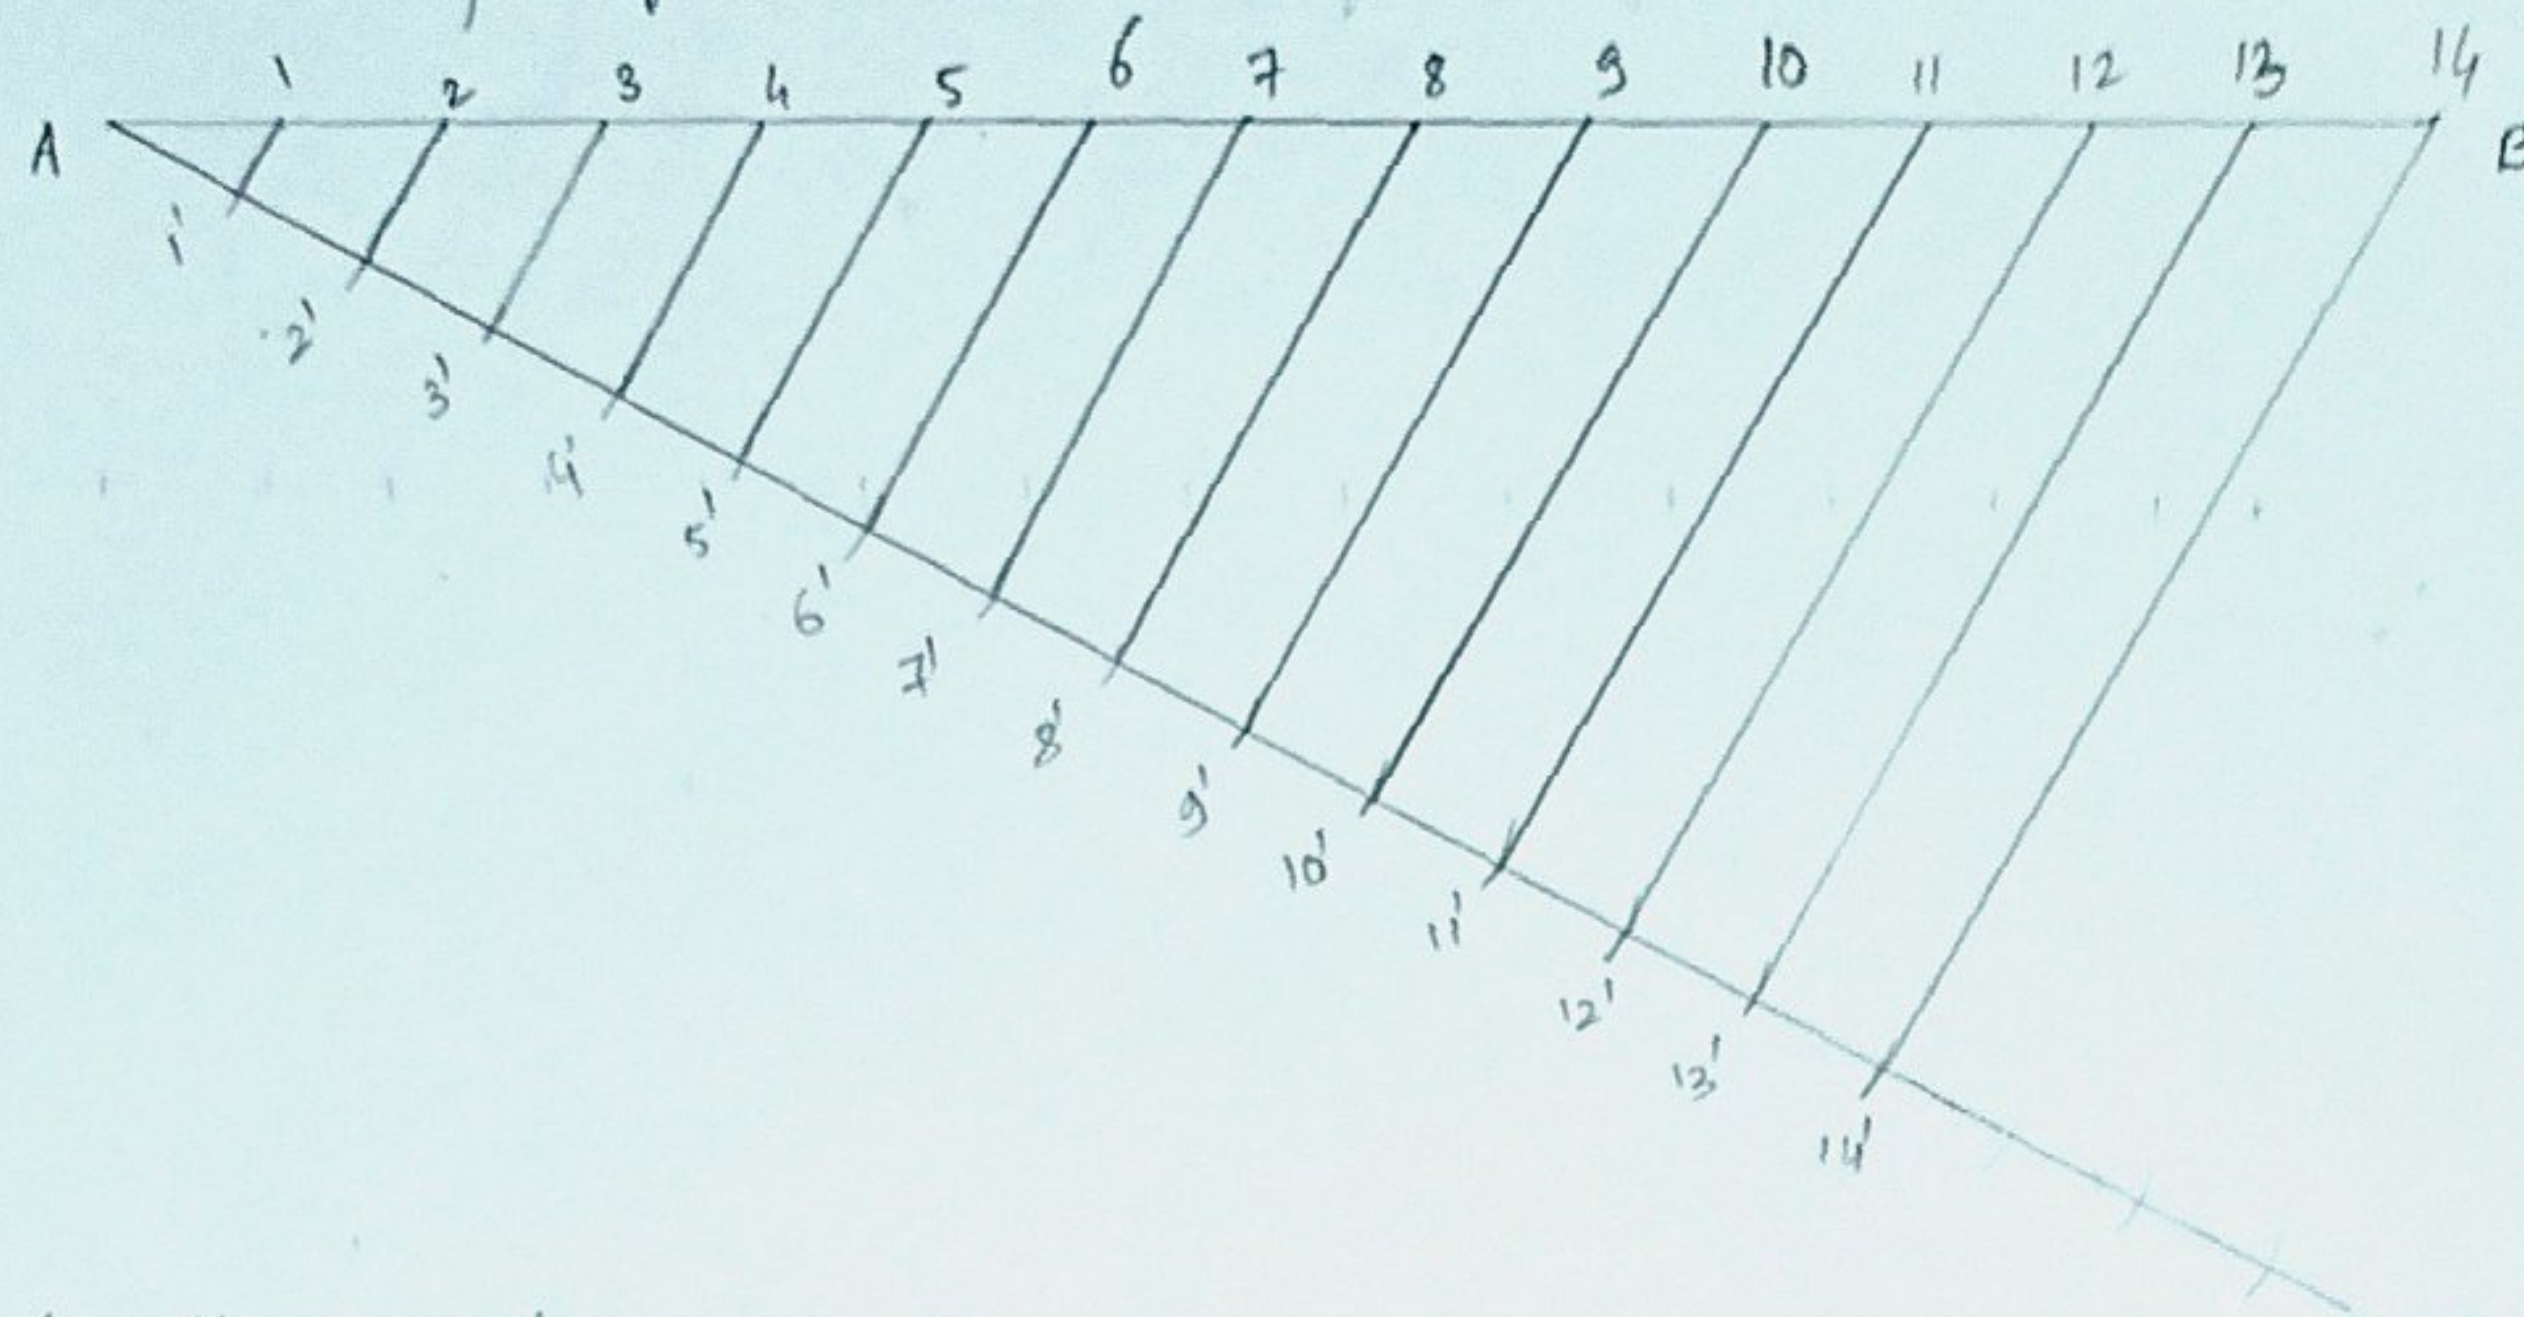

Title: Sheet on Geometric Construction

Class: FY B-Tech (Comp Engg) Roll No: 24C0867

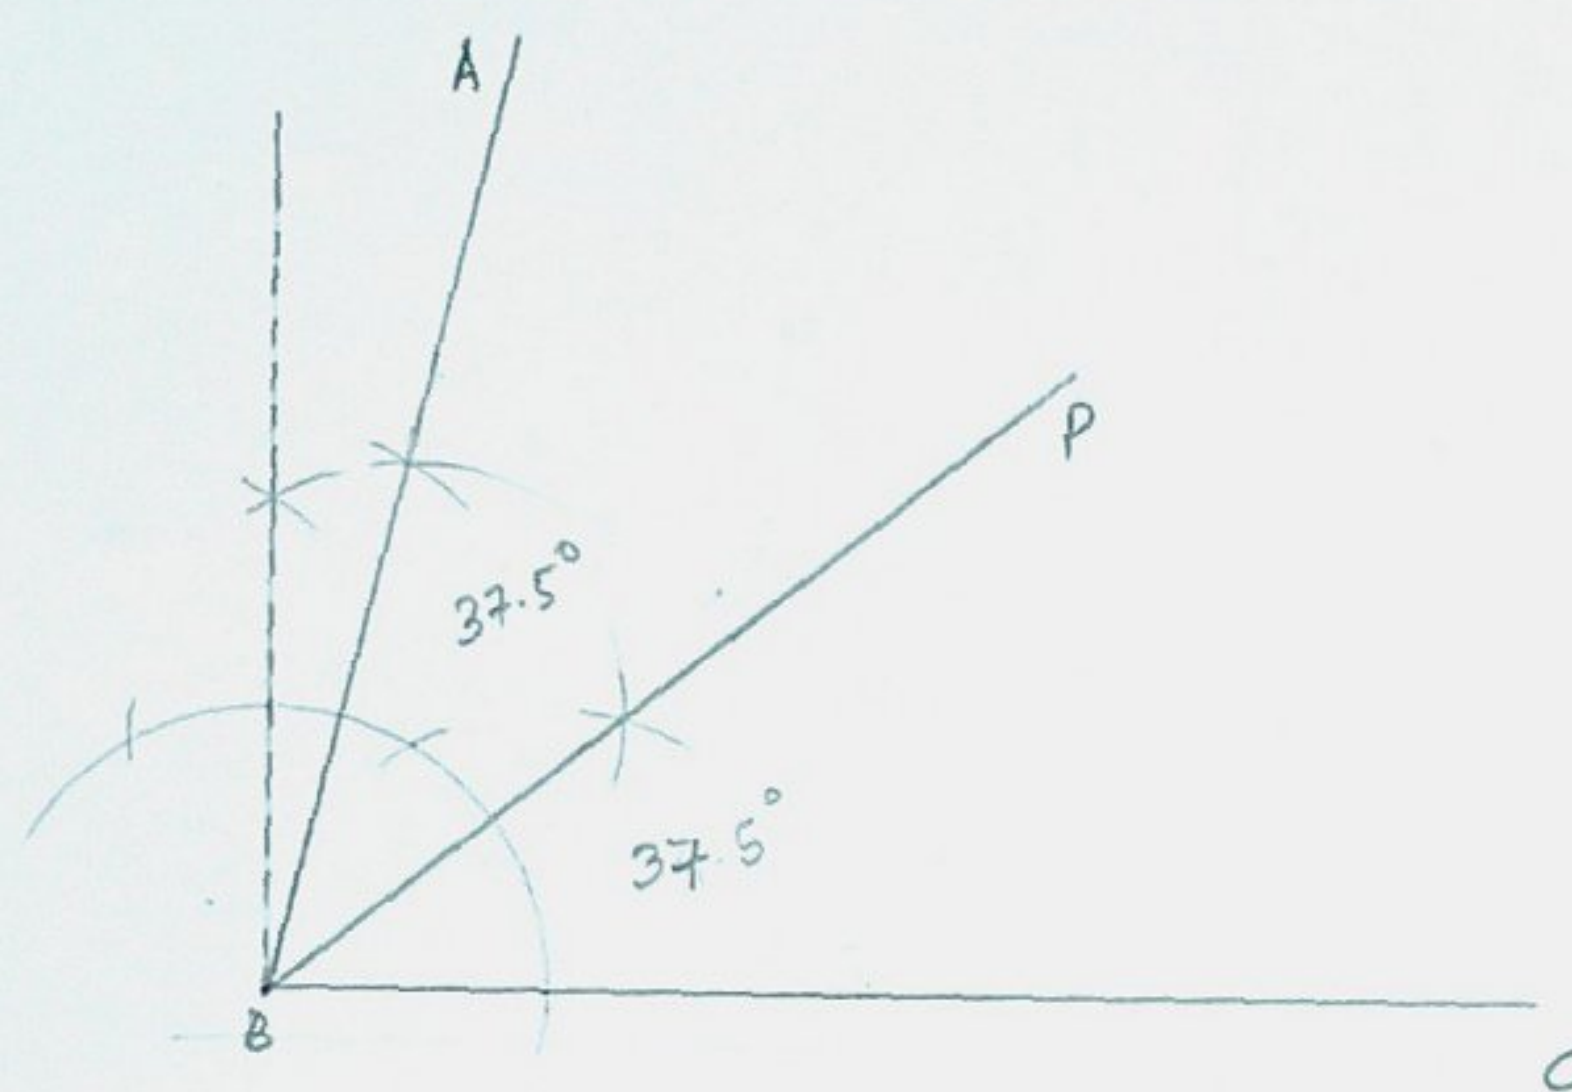

DATE: SHEET NO: 02 Scale: -

Method of Projection: 1st Mark: -

① Divide the line of length 187 mm into 14 equal parts.

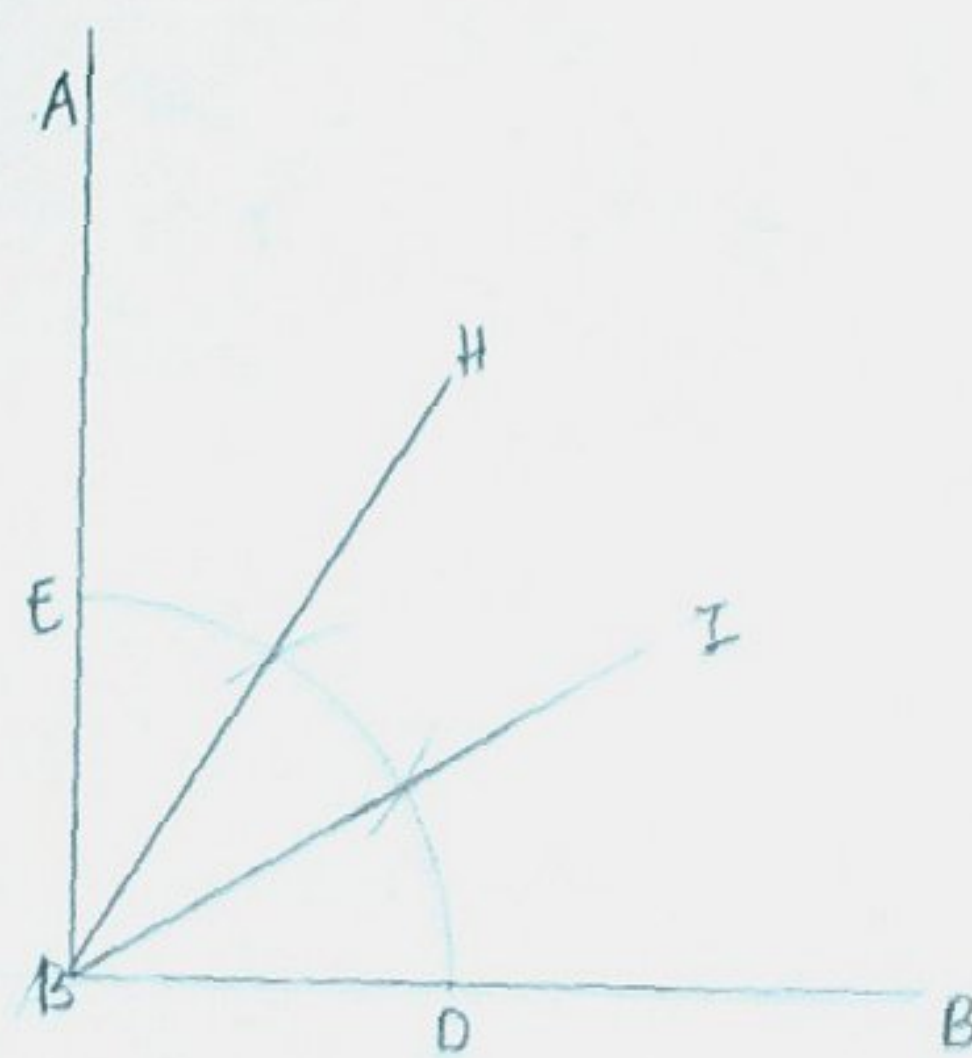

② Bisect the angle of 75° with the help of compass.

$$\angle ABC = 75^\circ$$

$$\angle ABP = \angle PBC = 37.5^\circ$$

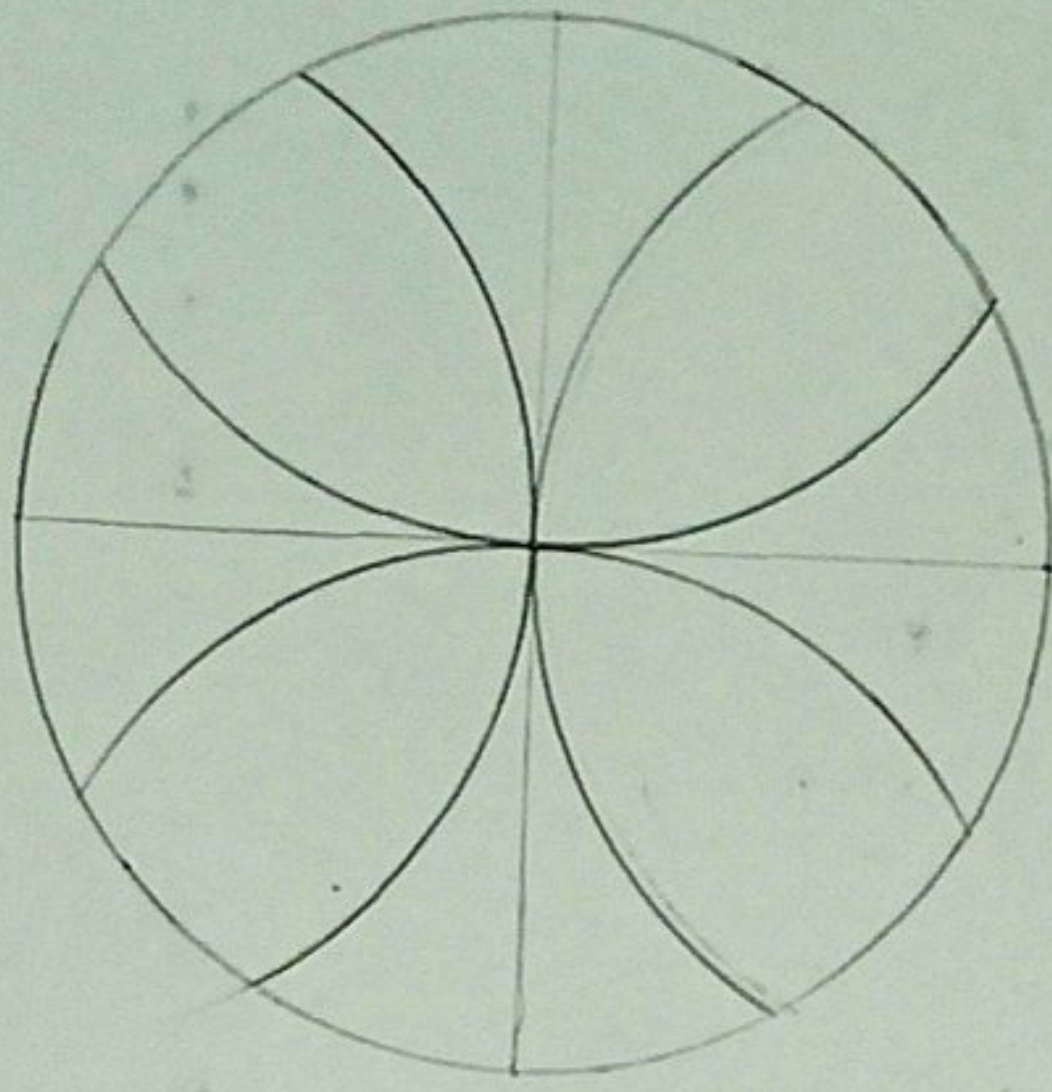

3. Trisect the given angle 90° with the help of compass.

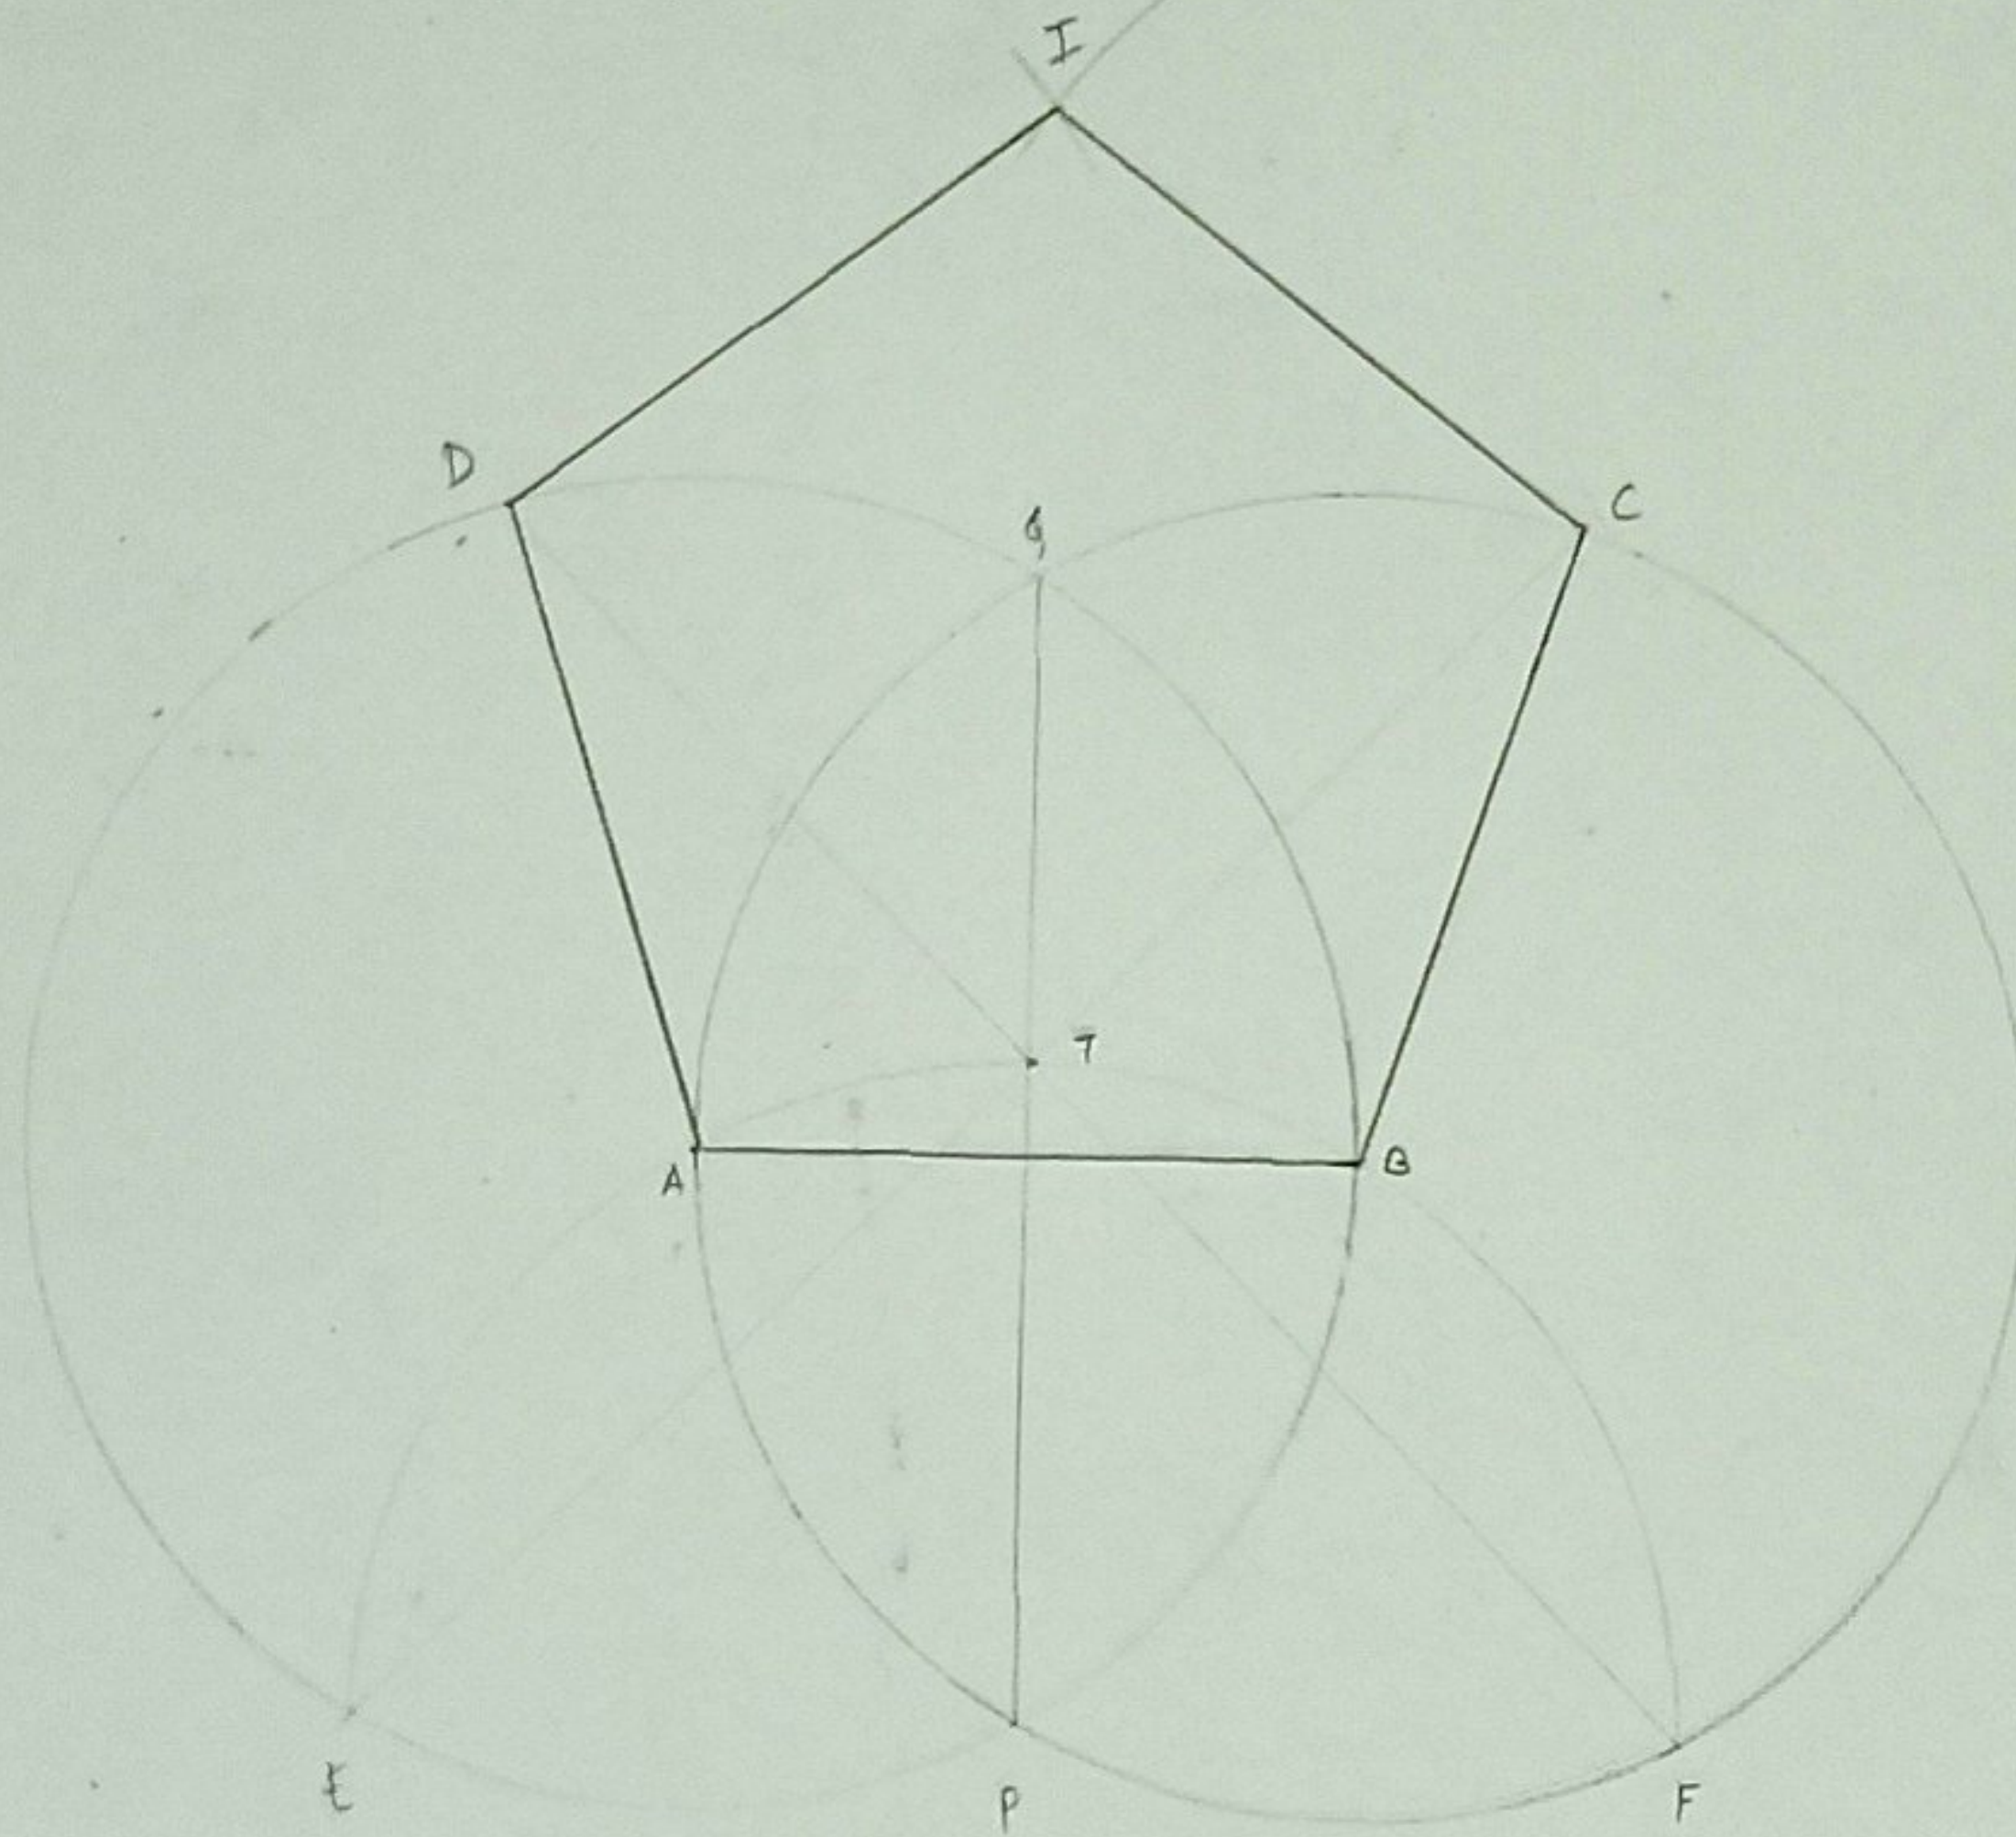

$$\angle ABC = 90^\circ$$

$$\frac{\angle ABC}{3} = \angle ABH = \angle HBI = \angle IBC$$

Q:4) Divide the given Circle of 80mm into 12 equal parts.

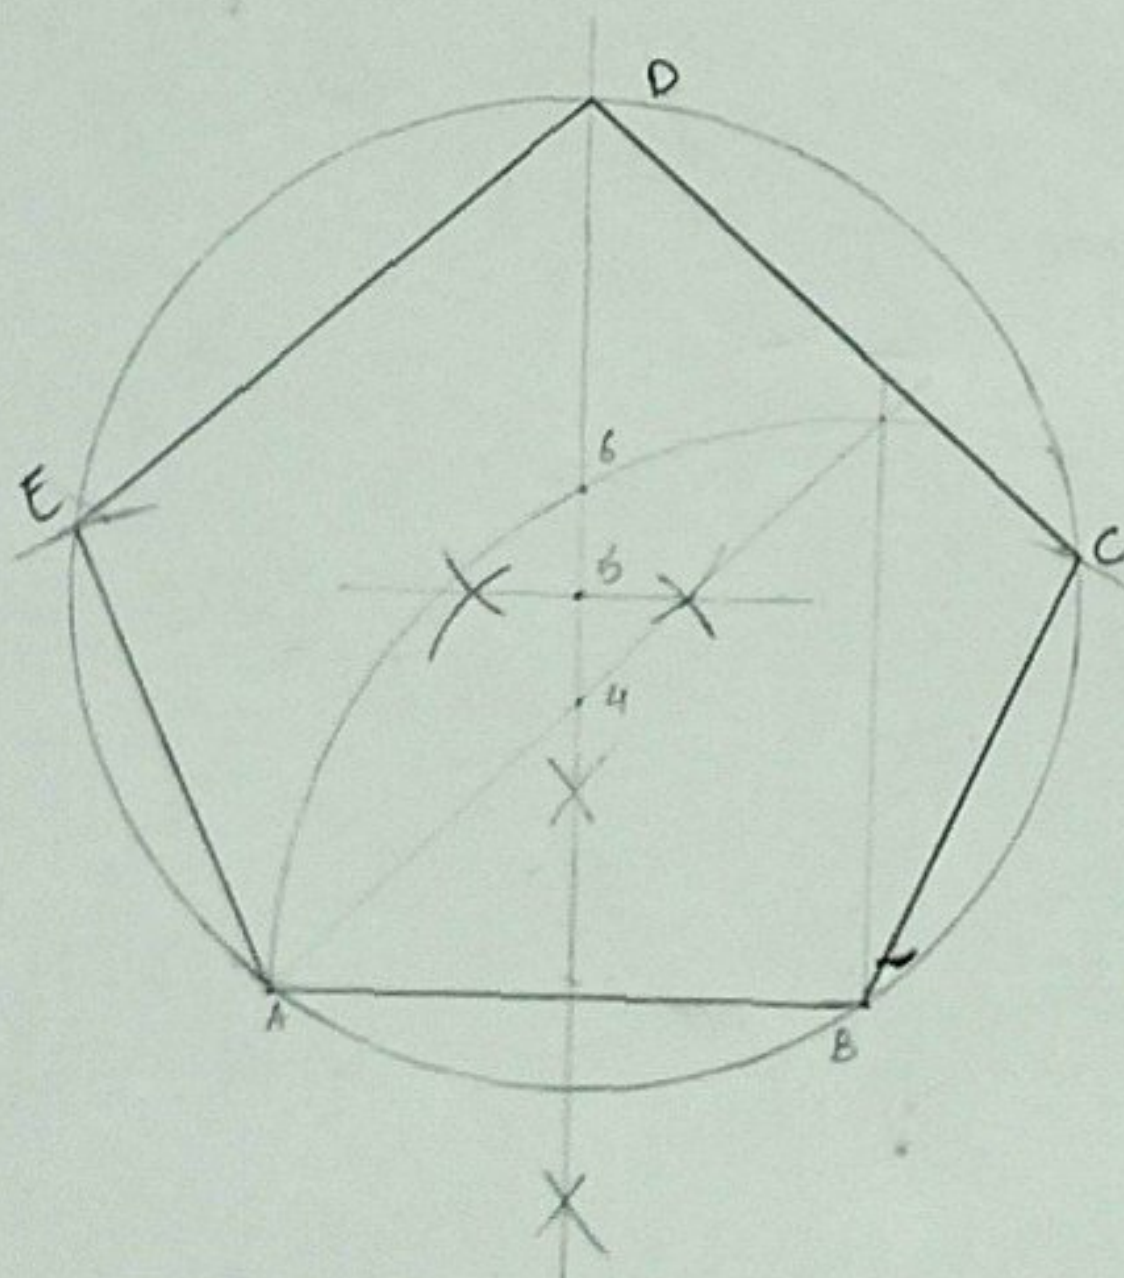

5. Draw a pentagon of 60mm length with the special method.

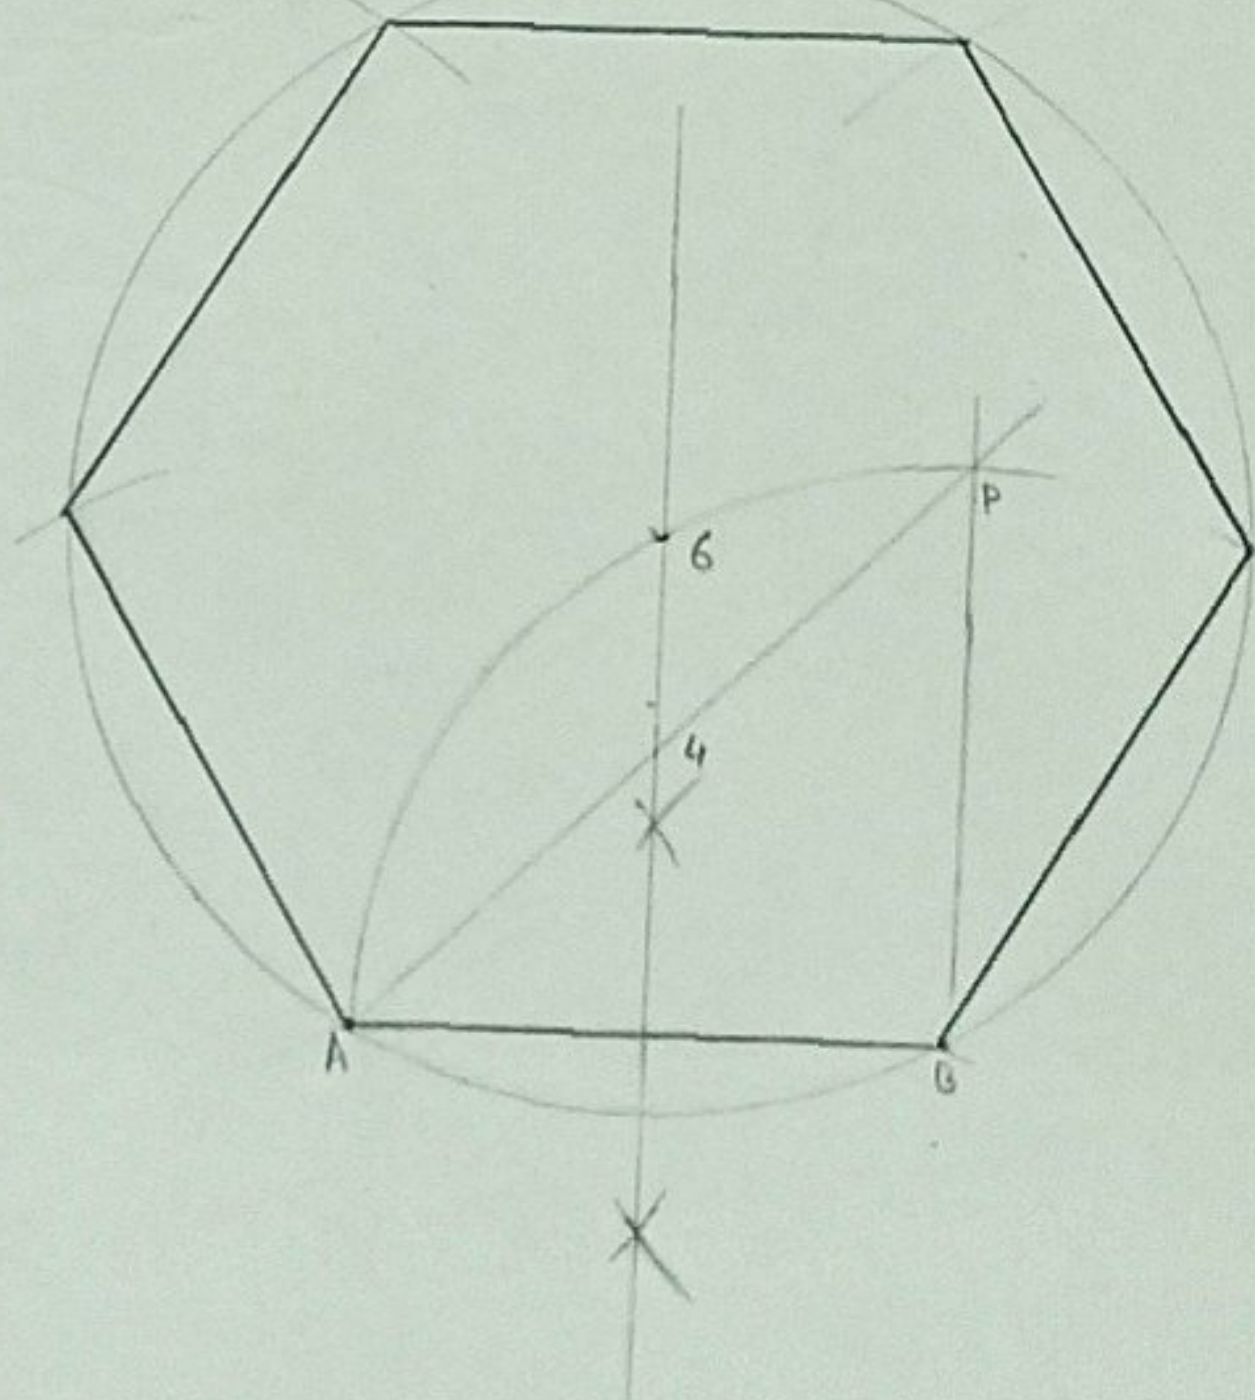

6. Draw a pentagon & Hexagon of 50 mm side by the general method

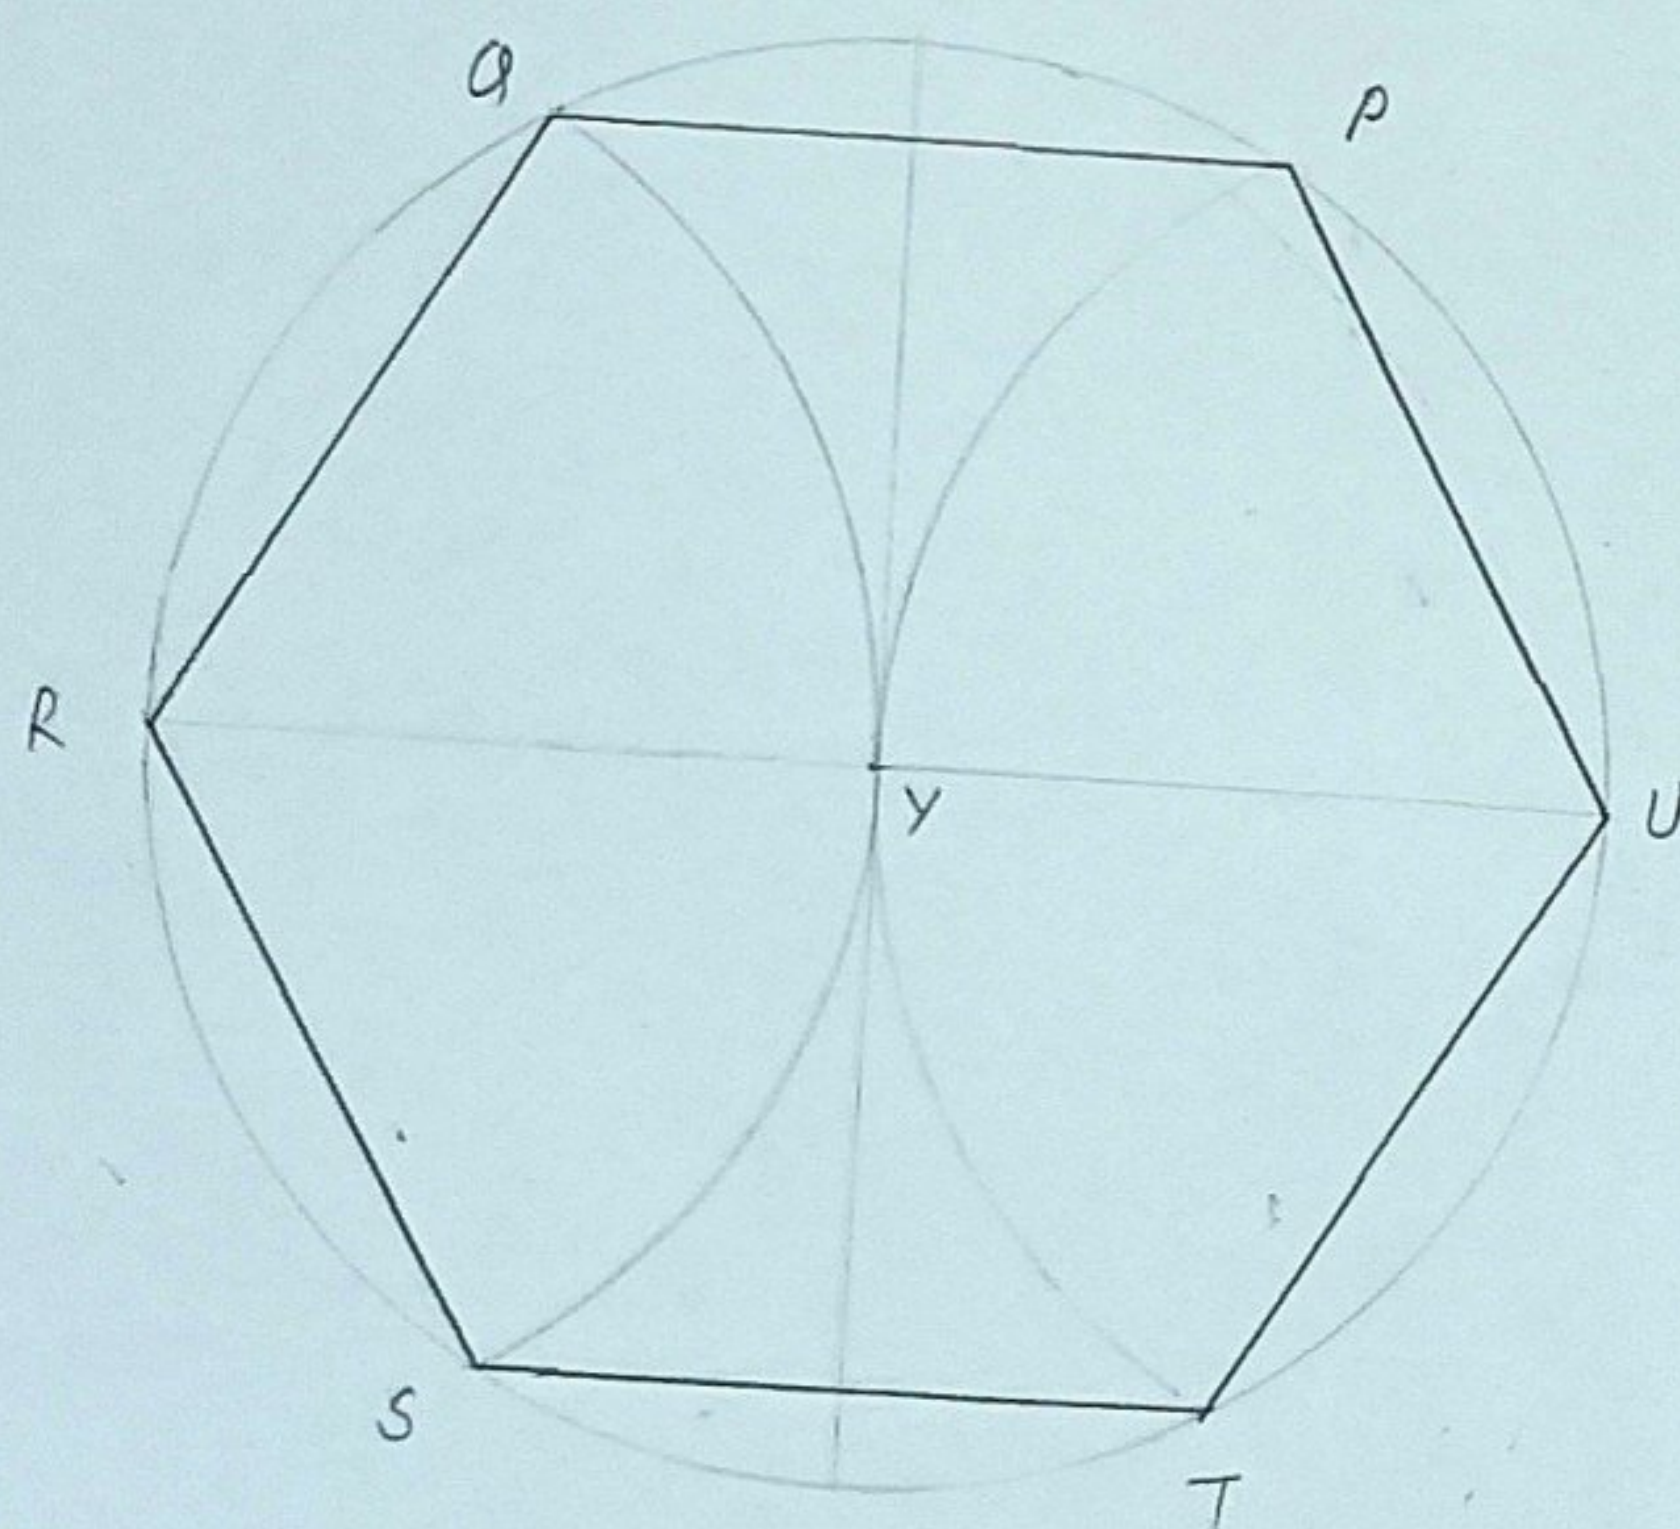

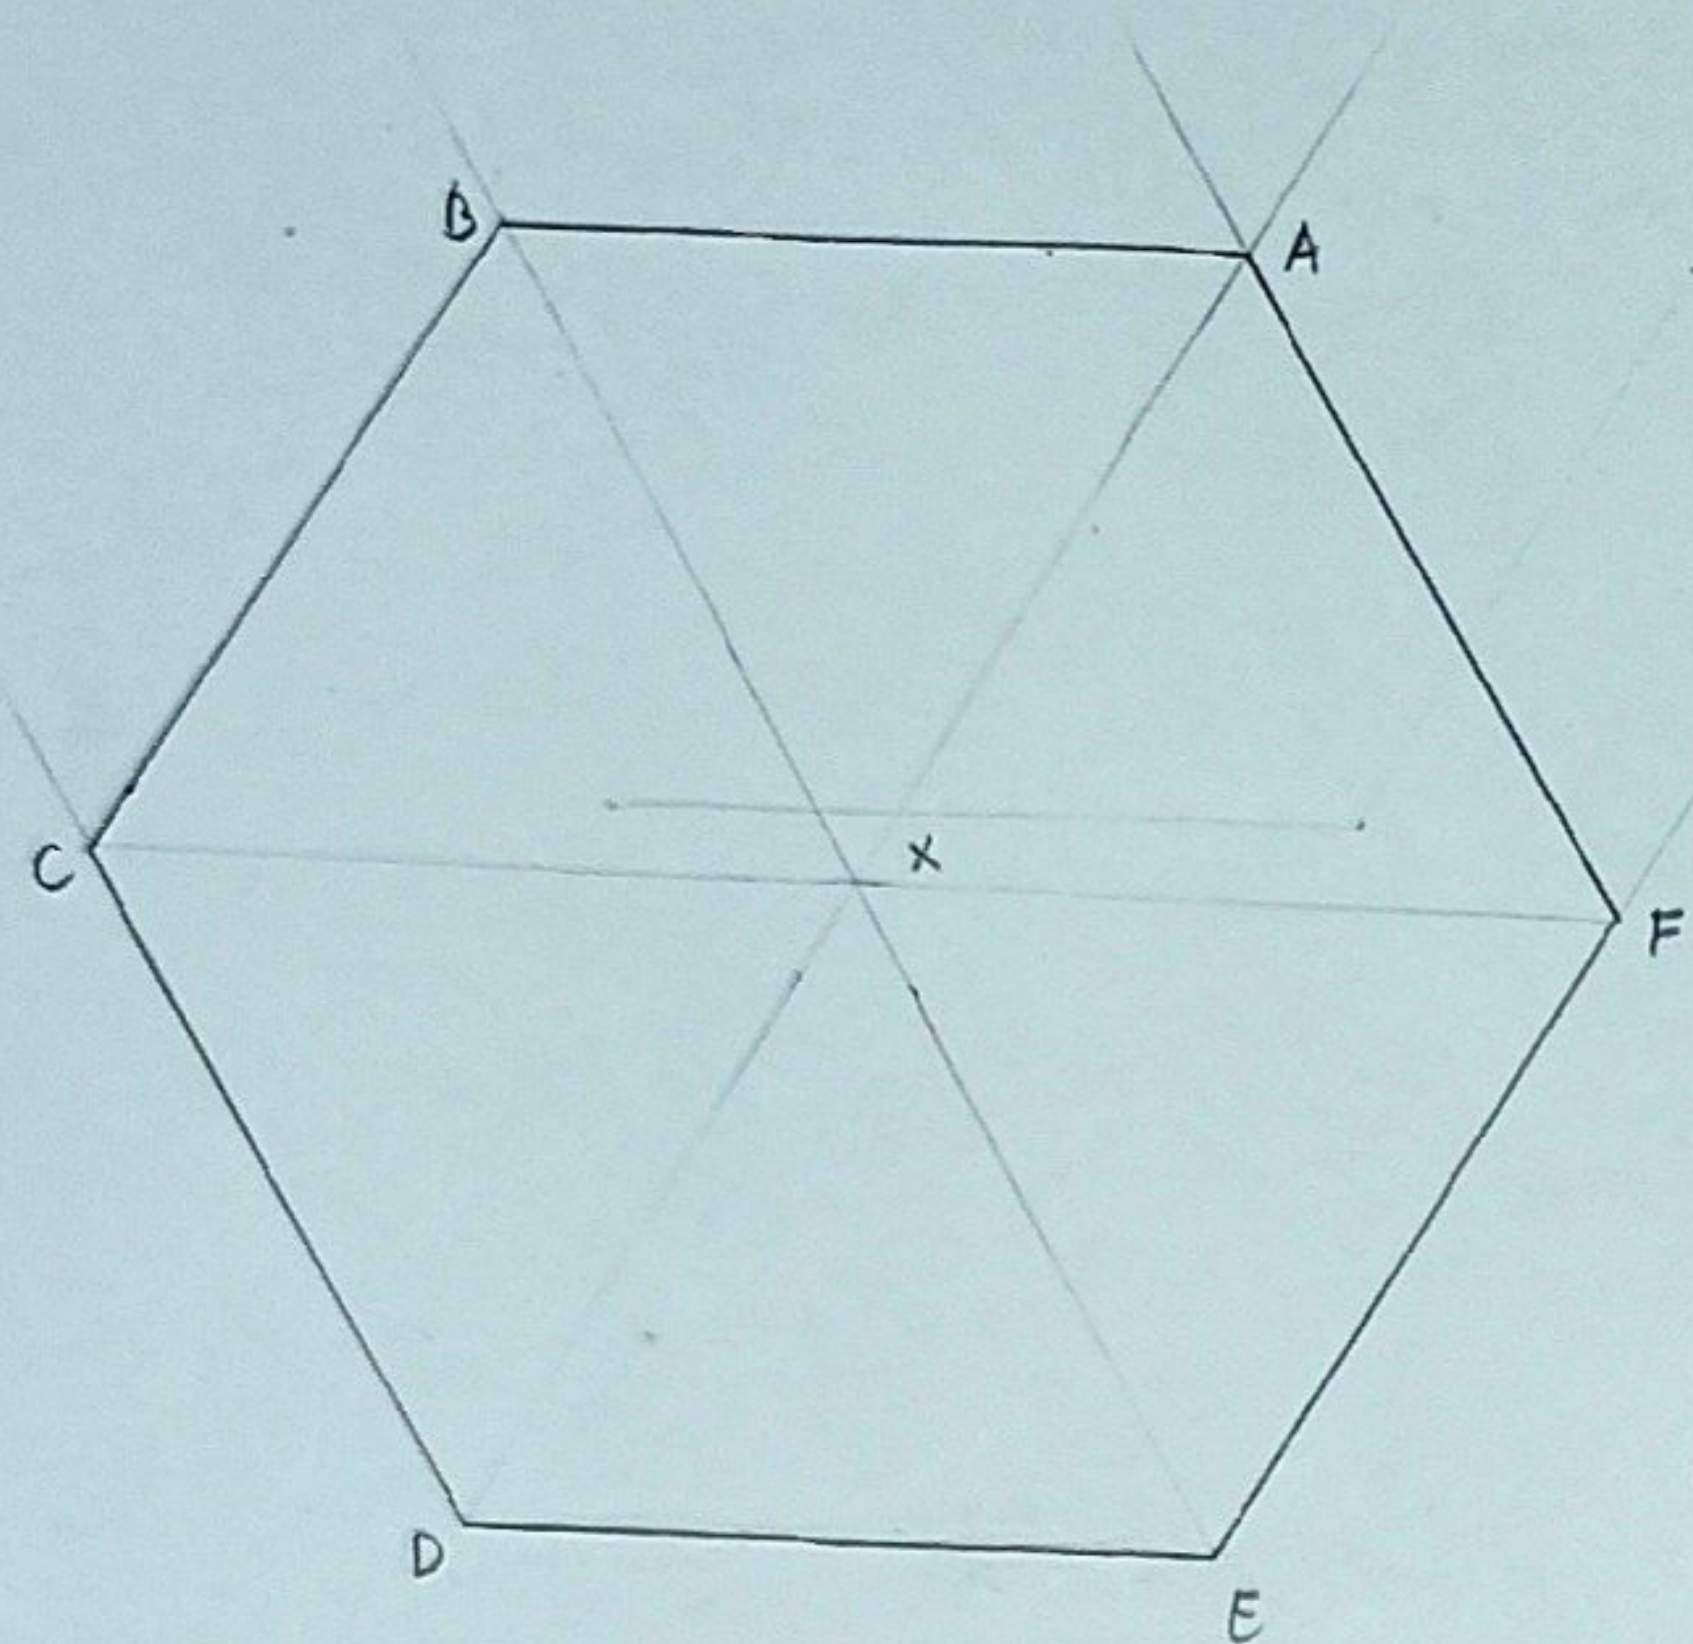

Pentagon:-

Hexagon :- General Method:-

⑦ Draw the Hexagon of 60 mm by a angle protector and compass.
